| • Bootstrap   | • responsiveness         |
| • React.js    | • full-stack development |

Front-end

Creativity

Leadership

## SUMMARY

Full-stack developer, with history in computer engineering looking to help build more dynamic experiences for users on the web. Obtained certificate from Vanderbilt University in full stack development. Strong skills in Javascript, CSS, React.js, and responsiveness for web design. Known as a great leader, problem solver, and role/team player. Recently, helped build a single-page MERN app that hosts retro games such as tetris and yahtzee while having capability of optional multiplayer/single player gaming. Excited to showcase skills as a developer based on quality, with members who also have strong passion for coding. Would love to be a part of an environment that can impact the experiences for clients/users worldwide.

## PROJECTS

### CATRO GAMING

[catro-gaming.herokuapp.com/](https://catro-gaming.herokuapp.com/)

[github.com/JoelKovalcson/Catro-Gaming](https://github.com/JoelKovalcson/Catro-Gaming)

Scalable arcade gaming application designed to give users a central hub to play their favorite games.

- Contributed towards React development, styling, planning, and logo creation
- Includes React.js, MongoDB, Express.js, Node.js, GraphQL, and Apollo

### CHATTLESHIP

[chattleship.herokuapp.com/](https://chattleship.herokuapp.com/)

[github.com/JoelKovalcson/ChattleShip](https://github.com/JoelKovalcson/ChattleShip)

Chattleship is an online game inspired by the classic game Battleship with additional modern features.

- Worked on front-end development, implementing Tailwind style css.
- Maintained organized retro theme for classic-style gaming
- Helped improve overall CSS style to the page based on team's theme preferences
